About Me

I build tools I wish existed — like a personal movie tracker or an AI debug assistant. I move fast, keep things minimal, and finish what I start. Whether it's automation or full-stack dev, I enjoy solving real problems with code. I work best in environments where I can build with autonomy and ship fast.

Technical Skills

Languages: Python, JavaScript, Java, C++, SQL, Kotlin, HTML, CSS

Frameworks & Tools: React, Firebase, Git/GitHub, Netlify, Bolt.new, Chart.js

AI & Automation: Prompt Engineering, OpenAI APIs, Python NLP (NLTK), Workflow Scripting

Others: REST APIs, JSON, Markdown, Bash, Unix/Linux, UI/UX Systems

Projects

AI Debug Assistant

[GitHub](#)

- FastAPI-based assistant that parses Python tracebacks and suggests fixes.
- Uses LangChain + OpenAI for smart summaries and resource linking.

Screenshot to Markdown Organizer

[GitHub](#)

- Converts screenshots with annotations into Markdown or PDF using Tesseract OCR.
- Designed for personal knowledge workflows and document generation.

TOTP Authenticator CLI Tool

[GitHub](#)

- CLI tool that generates secure RFC6238-based 2FA codes from base32/email secrets.
- Lightweight, fully offline, and terminal-friendly.

Cloud URL Shortener with Analytics

[GitHub](#)

- FastAPI backend with JWT auth, MongoDB storage, and analytics dashboard.
- Frontend built with Chart.js + Bootstrap; deployed on Render.

CI/CD Flask Blog Platform

[GitHub](#)

- Markdown-based blog engine with RSS feed, post editor, and GitHub Actions CI.
- Dockerized and deployed using AWS S3 for static hosting.

Supermind Web App

[Live Demo](#)

- Timeline-based dashboard for organizing notes, links, and content.
- Built with Bolt.new, featuring tagging and mobile responsiveness.

Education

Gayatri Vidya Parshad College of Engineering

Aug 2023 – May 2027

B.Tech in Computer Science Engineering

Coursework: Data Structures, Operating Systems, Computer Networks, Software Engineering, AI, ML, NLP

Certifications

- Prompt Engineering & Programming with OpenAI – Columbia University
- Google IT Automation with Python – Coursera
- AWS Cloud Practitioner
- DevOps with GitHub Actions and Docker (self-taught)
- JavaScript and Web Foundations (Codecademy)
- HTML, CSS, JavaScript – One Month

Highlights & Strengths

- Strong ownership mindset: I start, build, and finish projects solo
- Thrive in startup-style, high-speed environments
- Full-stack developer with deep design and UX instincts
- Problem-solver who blends AI thinking with real user needs
- Self-taught, self-driven, always learning something new
- Passionate about building things that matter to me — and others

Awards & Roles

- President, Computer Club – GVPCOE
- Winner, CSI WIZKID Quiz (2019)
- Innovation Volunteer – St. Ann's School
- Overall Best Student – High School (2021)

Languages

- English: C1
- German: A1
- Telugu: Native
- Hindi: B1
